

## Addendum to Bid #10 – 2024 Rock Bid

It was brought to my attention that the Callaway County 2024 Rock and Aggregate Materials Bid package talks about the delivery of the materials and in one section it lists the delivery location as our Road and Bridge Department Office location in Fulton, MO. Please see item 5. on page 3 of the bid package that reads as follows; “Road and Bridge Department will pick up the materials at the Vendor's place of business which must be located within Callaway County or within 25 vehicular miles of the county border and the Vendor shall load and provide a means for weighing the materials. The vendor shall provide a rock ticket to each driver that picks up the rock or aggregate with the following information; Vendor Name, Ticket Number, date and time of pick-up, quarry location, customer name, name of bid in effect, road number for rock delivery, bid item name and number, and truck weights (gross, tare, and net).” For this bid, delivery shall be considered the Vendor loading the provided materials on trucks to be provided by the County at the Vendor’s qualifying location. Please disregard any language that conflicts with this section and let me know if you have any other questions.

Sincerely,

H. David Thomas, PE

Callaway County Road and Bridge Department Administrator
